Dhairyasheel Wangdare

Kolhapur, Maharashtra | +91 8767564478
dhairyasheelwangdare087@gmail.com

Education

Dr. D.Y. Patil College Of Engineering & Technology | Maharashtra
Computer Science Engineering(Data Science) | 06/2026

- **GPA :** 6.72 / 10.00
- **Coursework :** Data Science , Data Analytics , Data Processing , Dashboard , SDLC , DSA (python3)
- **Portfolio:**dhairyasheelwangdareport1409.netlify.app

Experience

IIT Bombay | remote
Data Science and Machine Learning Intern | 07/2025 - 09/2025

- Developed a multimodal machine learning pipeline to detect cognitive load using EEG and GSR data. Implemented signal preprocessing, feature extraction, and supervised classification using Python and achieved interpretable results linking physiological patterns to task difficulty.git_repo_click

Softron | Kolhapur
Android Developer Intern | 03/2024 - 04/2024

- Gained practical experience in android app development , contributed to design and UI.

Publications and Achievements

- **MedDetect AI :** "Developed a Deep Learning System for Multi-Class Medical Image Diagnosis with Grad-CAM Visualization" . link_to_paper .
- **SWAYAM-NPTEL Course Completions :** Completed following courses ,Business Intelligence & Analytics, Applied Linear Algebra, Cloud Computing, Mathematical Foundations for Machine Learning.
- **MetaMorphosis 2K25 :** Completed Intensive workshop focused on Docker and Kubernetes operations by Walchand Linux Users' Group (Feb 2025).
- **Generative AI Pilot Program :** Completed participation in GenAI applications.

Projects

1. **MedDetect AI:** Built a Deep Learning System for Multi-Class Medical Image Diagnosis with Grad-CAM Visualization. Developed a deep learning web application for MRI and CT image classification, experimented with different CNN models to achieve 95%+ accuracy. Preprocessed large image datasets and trained CNN models . git_repo_click
2. **E-Commerce Product & Conversion Analytics :** Built an end-to-end Interactive e-commerce analytics project built with PySpark, Python, Pandas, Plotly, Docker, and Streamlit. git_repo_click
3. **IRCTC Foodie :** Developed a web platform for food ordering and delivery tailored for IRCTC travelers and vendors. Utilized HTML, CSS, ReactJS, TypeScript, and MySQL to build a reliable and user-friendly interface.

Technical Skills

- **Programming & Tools:** Python,Docker, Numpy, SQL .
- **Machine Learning & Data Science:** Machine Learning, ETL process , SDLC ,Statistical Modeling, Data Analysis, Deep Learning , CNN .
- **Data Visualization:** Power BI, Tableau, Excel Dashboards, Streamlit.
- **Web Development:** HTML, CSS, TypeScript.
- **Other languages:** Hindi ,English ,Marathi ,Deutsch.
